

ultimate light control

ROLLER BLOCKOUT SYSTEM

The blockout framing system has been designed to block out light to aid sleep and satisfy the practical needs for complete darkness.

Ideal for use in bedrooms, home offices and in the lounge for avid movie watchers, Blockout blinds are a cost effective and easy to install solution that can be manually operated or motorised using the One Touch Mains Powered AC Motor. Motorisation is convenient and has the benefit of child safety.

Our Blockout blinds are operated with market leading roller blind systems - System 32, System 32/40 Hybrid and System 40/45 closed cassettes for effortless operation.

The sleek design with minimum window obstruction means the roller blockout system is the perfect choice for rooms in which light control is essential.
